

1/a A curriculum consists of subjects. A subject can be part of multiple curricula at the same time, and it does not have to be part of any curriculum.

1/b. A university has departments: there is no university without departments, and no department exists without a university. A department can only belong to one university and ceases to exist if its university is closed.

aggregation:

The same object can have multiple owners, and an owner can exist without an owned object

Curriculum

A subject can belong to 0, 1, ... curricula

Subject

Curriculum needs at least one subject

If multiplicity is not specified, it defaults to 1

composition: the container cannot exist without the contained, the contained can only be a part of one container

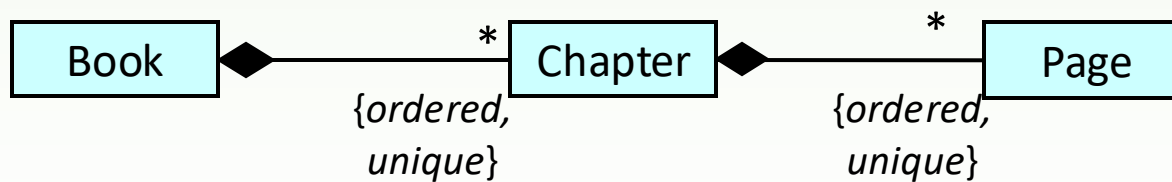

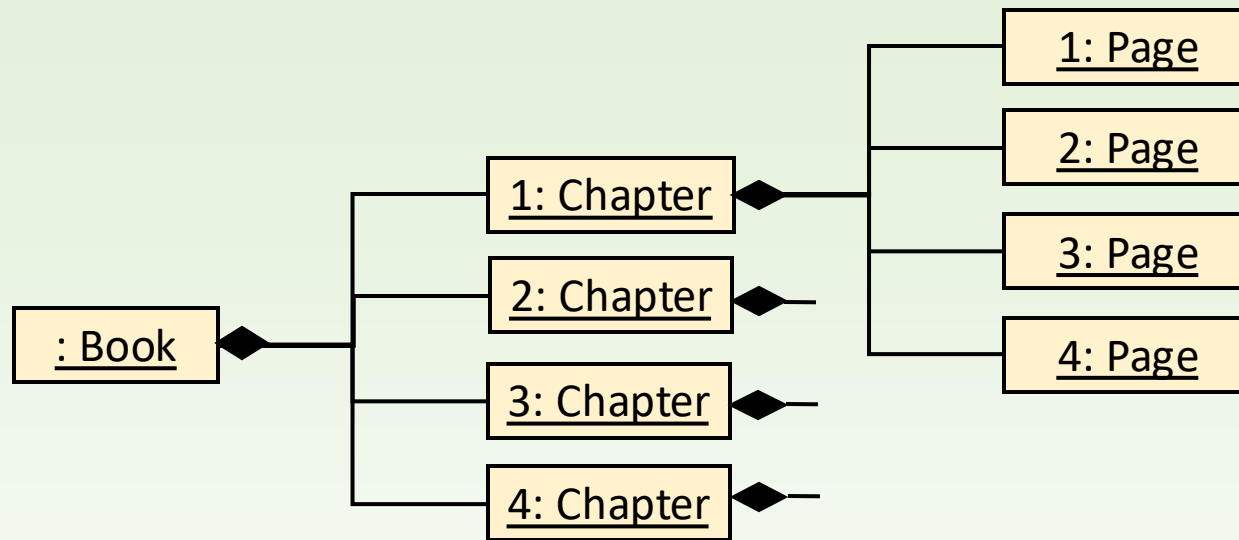

University

1 or 0..1 because of composition

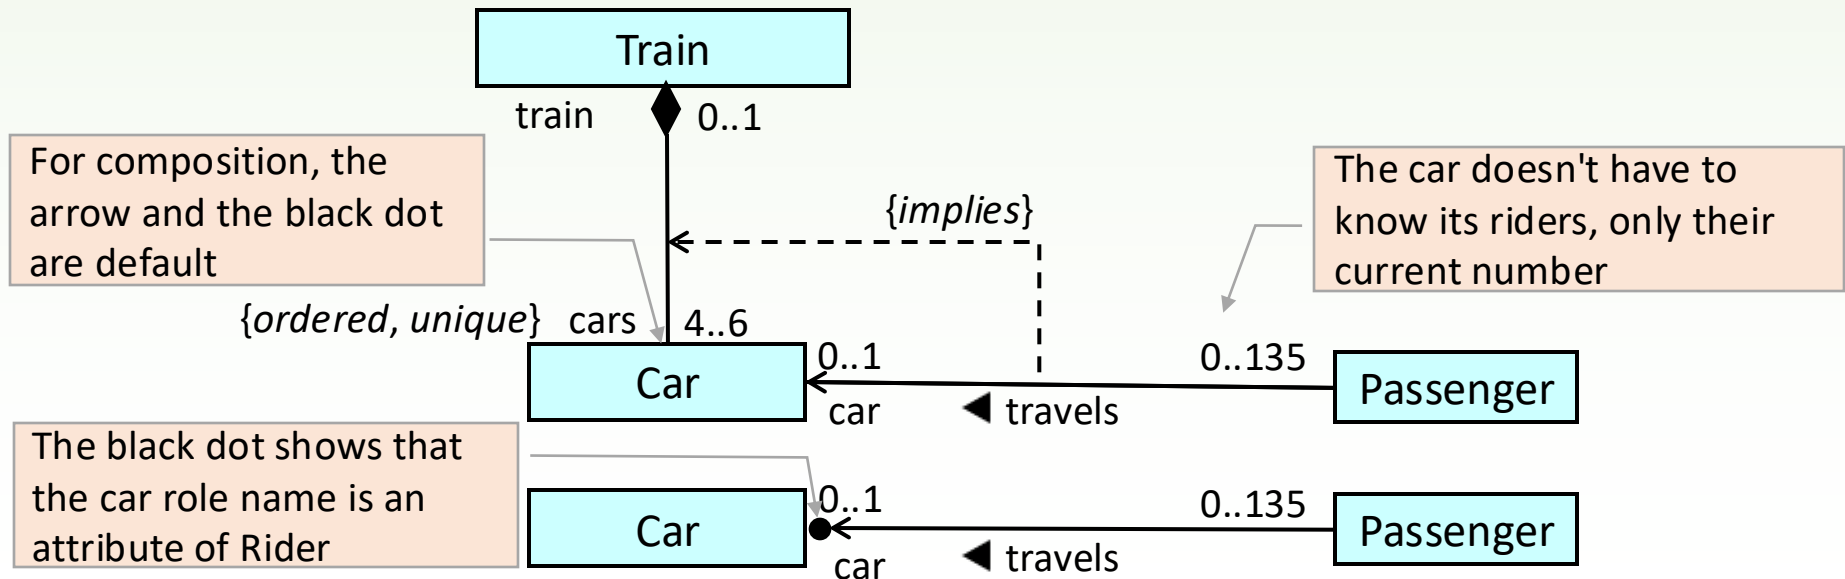

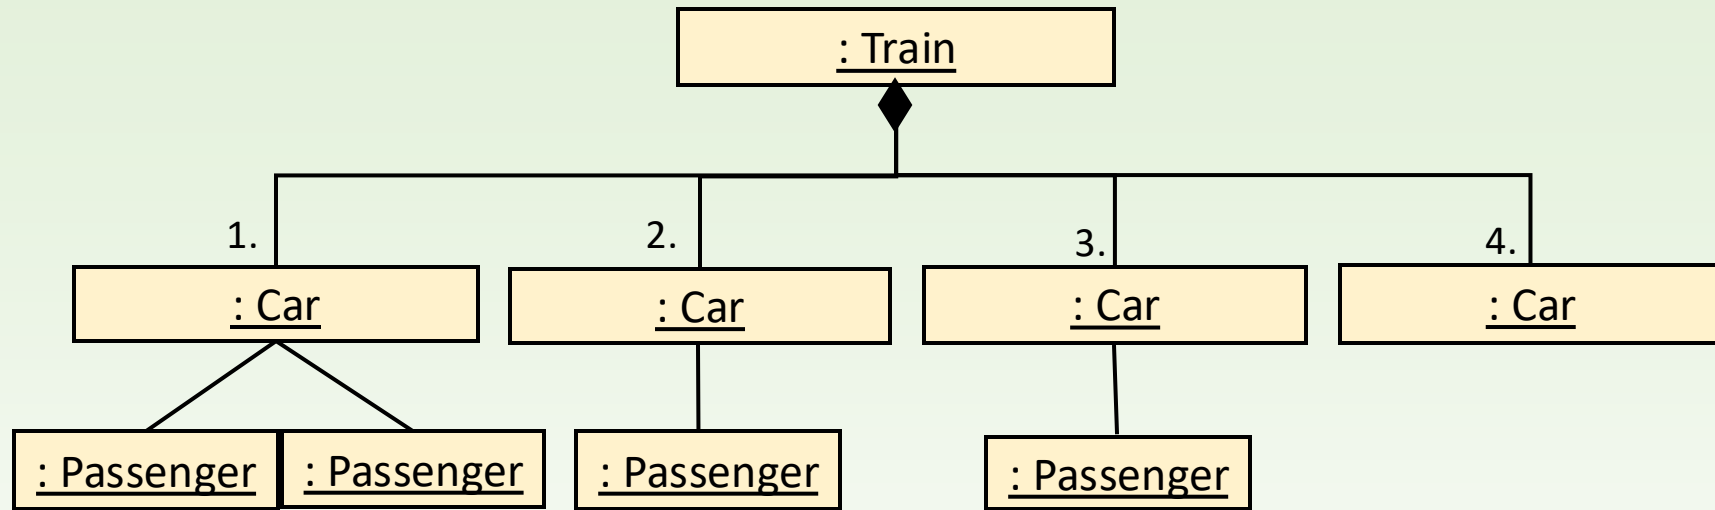

Department

This means 1..* because of the composition

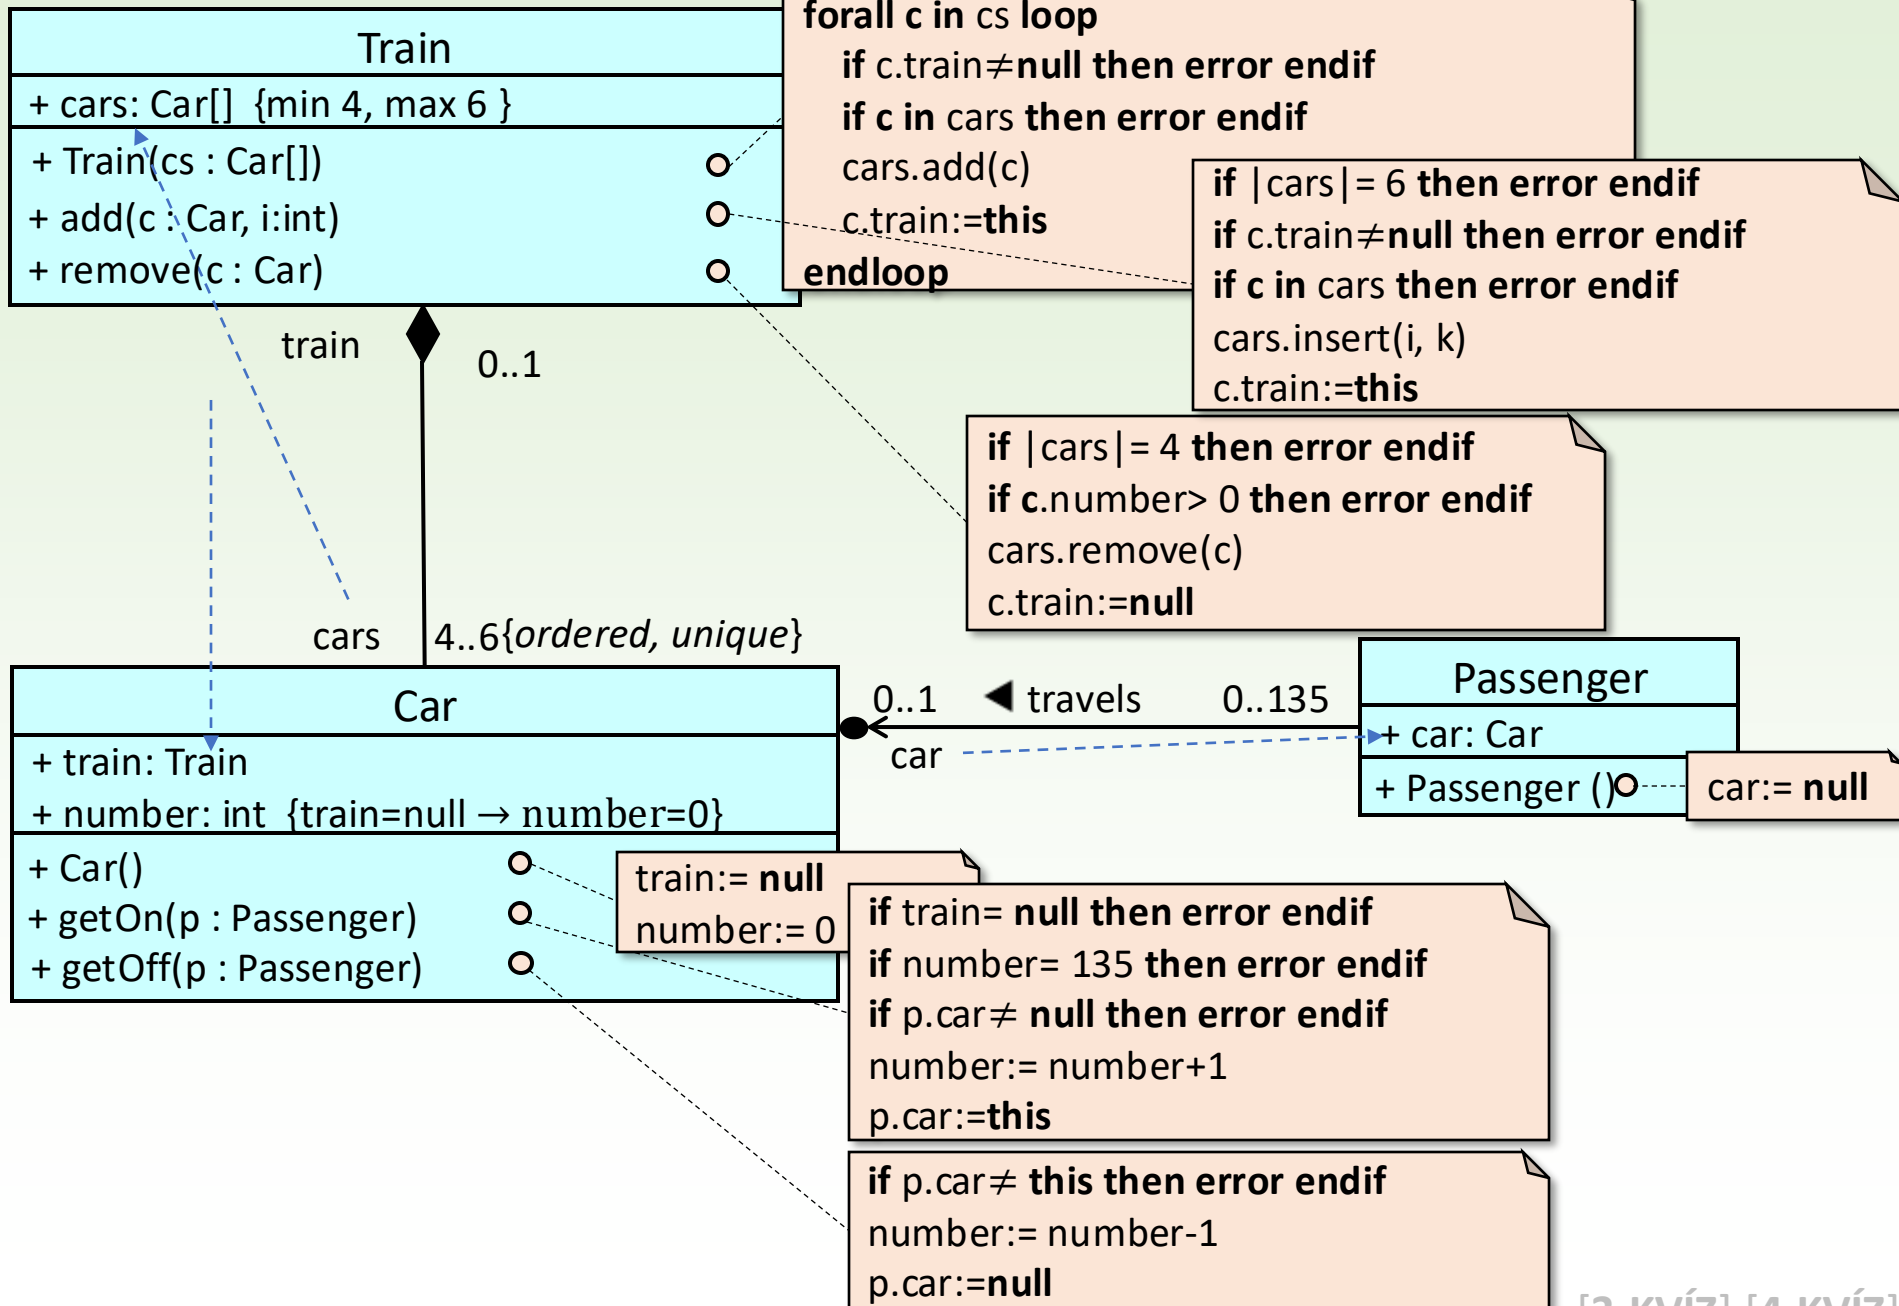

2. A book consists of at least one chapter, and a chapter contains at least one page.

3. A metro train consists of four, five, or six cars connected in a specific order. A passenger can board a metro car only if it is already part of a train. A metro car can accommodate up to 135 passengers.

Methods needed for relationships

6. A company employs individuals in various positions. The job description includes the job start date, the job title, and the salary.
